STAT

MEMORANDUM FOR: [REDACTED]

SUBJECT : CIRIS On-Line Data

STAT

STA

1. This is to confirm our conversation of several weeks ago concerning the cost of maintaining CIRIS data on-line.
2. In FY 73 we spent approximately [REDACTED] and in FY 74 approximately [REDACTED] on GIMS. This includes connect time charges as well as use charges.
3. As I told you, we are questioning the value of having this capability given its high cost and alternate methods of exploiting the data base. In fact currently we are running a test to determine if we can live without GIMS.
4. If we can help in any way to insure the success of your work with the microfilm system, let us know.
